01 About greenset

Global Leader in Sports Surfaces

At GreenSet, we combine sustainable practices with innovative craftsmanship to deliver high-performance, cutting-edge courts that set the global standard for excellence.

25,000+ Courts built

50+ Countries

50 Years of experience

600 Major Tournaments

tennis | padel | pickleball | urban

02 Mission, vision and values

MISSION

greenset is dedicated to designing, manufacturing, and installing premium sports courts that set the standard for quality and performance. We strive to enhance the playing experience by focusing on innovation, sustainability, and exceptional customer service, fostering the growth of racket sports worldwide.

VISION

To be the global leader in racket sport court solutions, transforming sports facilities with innovative, sustainable, and high-quality courts that inspire athletes, clubs and communities to reach their greatness.

VALUES

greenset is committed to performance, quality, and sustainability, delivering engineered courts designed for top athletes. With superior surfaces, eco-friendly innovation, and premium service, it remains a global leader, trusted by major tournaments, training centers, and professional organizations worldwide.

03 Our excellence

The ATP Standard

Official surface of the ATP Tour, used at Australian Open and ATP Finals.

Olympic Heritage

Technology powered the Rio 2016 Olympics and Paris 2024 Olympics, demonstrating elite performance.

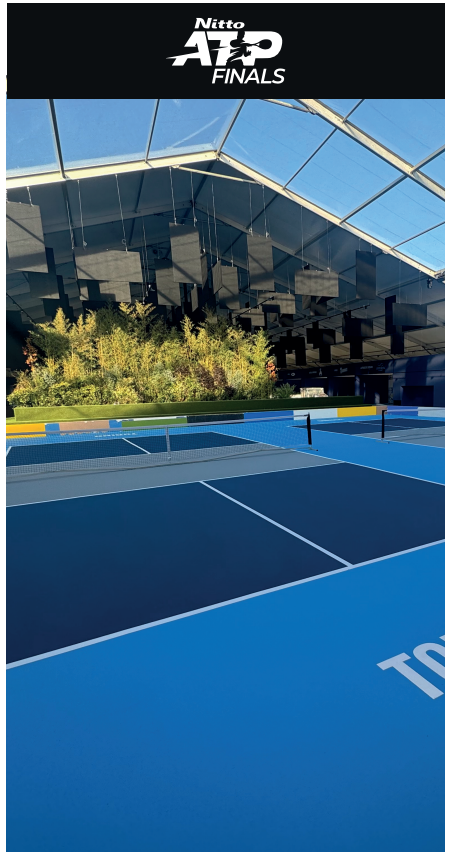

Global Footprint

Over 25,000 courts built worldwide for iconic players and academies.

Innovation DNA

Led by Javier Sánchez Vicario, bringing elite sports science to every surface.

04 Our technology

High Purity resins

Proprietary formulas ensuring superior adhesion, extreme durability, and vibrant color retention.

Versatile systems

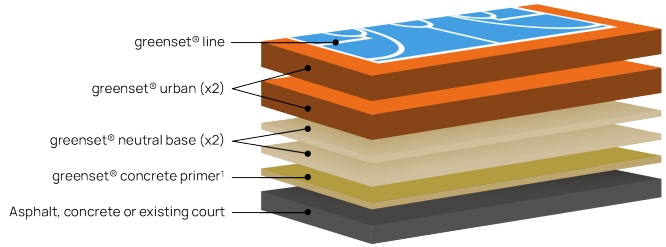

From "Grand Prix" to "Comfort," we adapt surfaces to the specific needs of athletes and cities.

Extreme resistance

Designed to withstand UV radiation and extreme thermal fluctuations without losing performance.

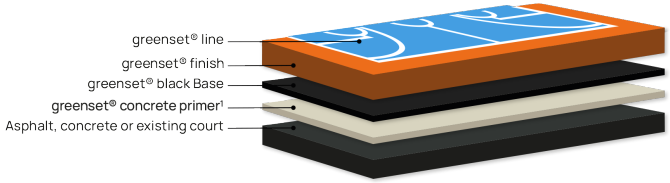

05 Urban Surface Systems

1 Only for Concrete.

Urban System

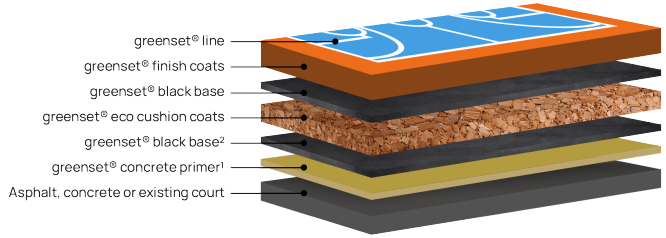

GreenSet® Multisport Urban is a high-quality, smooth acrylic coating specifically designed for continuous urban and sports pavements. Applied with roller, it provides a non-slip, wear-resistant surface ideal for sustainable mobility infrastructures and recreational areas.

1 Needed for concrete surfaces: use Concrete Primer

Tour Court

GreenSet® Urban Multisport Tour is a top-quality, non-slip, wear-resistant and highly durable surface engineered for intensive urban use and multisport facilities. Final coat applied with squeegee for maximum resistance and consistent playing experience, indoors and outdoors.

1 Needed for concrete surfaces: use Concrete Primer.
2 Only needed.

Eco Cushion

GreenSet® Multisport Eco Cushion Court is a top quality, non-slip, wear-resistant surface for tennis and multisport floors, indoor and outdoor. Developed in 1970 for moderate shock absorption and joint care. ITF classified as Medium to Medium-Slow. Most used in elite private clubs.

06 Sustainability and Eco-commitment

Eco-friendly formulations

Water-based, low-VOC resins free from heavy metals, ensuring safety for all.

Sustainable lifecycle

High durability reduces resurfacing cycles and the long-term carbon footprint.

Heat Island mitigation

Specialized pigments reflect solar radiation, reducing urban surface temperatures.

Circular economy

Prioritizing recyclable components for a truly sustainable urban infrastructure.

Our factory has been certified as meeting the requirements of ISO QUALITY MANAGEMENT SYSTEMS, as well as those of ISO ENVIRONMENTAL MANAGEMENT.

07 A new vision for cities

We transform gray asphalt into vibrant, safe paths for bikes, scooters, and pedestrians.
greenset urban is the color of the modern city.

Sustainable mobility

Safe paths for a greener future.

Urban branding

Color as a tool for city identity.

Smart city ally

Human-centric urban design.

Eco-efficiency

High-yield, sustainable materials.

08 Urban solutions in action

Bike lanes and mobility

High-visibility, anti-slip surfaces that ensure safety for cyclists in cities like Barcelona and Madrid.

Public spaces

Transformation of plazas, school playgrounds, and parks into colorful and vibrant community hubs.

Civil works

Integration of professional surfaces into large-scale municipal and private infrastructure projects.

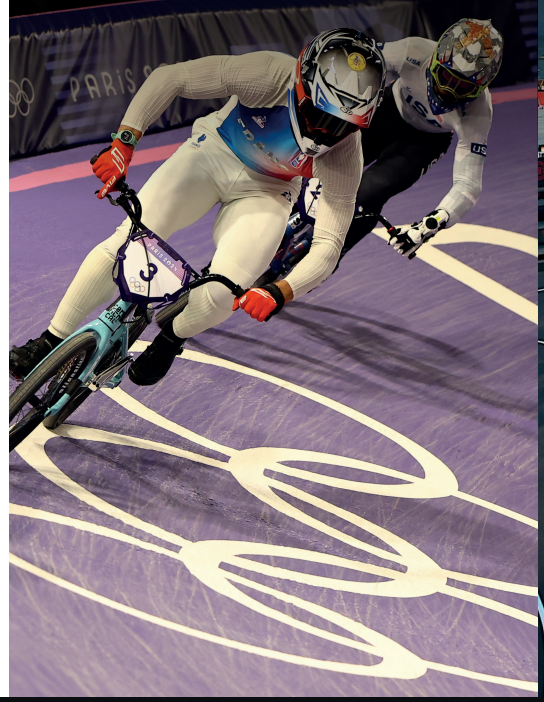

Safety first

Controlled textures that comply with international road and pedestrian safety regulations for all users.

09 Urban projects

Paris Olympics BMX track

Olympic Standards. High-performance surfacing engineered for elite competition and maximum speed at the Paris Games.

Kevin Durant NBA basketball court

Elite Performance. A professional-grade court designed for the highest level of play, merging NBA durability with superior grip.

Pau Gasol Nike basketball

Urban Legacy. Regenerating community spaces through a fusion of high-end sports technology and vibrant urban art.

10 Technical installation process

Preparation

Precision cleaning and leveling of the base for perfect chemical bonding.

Priming

Application of specialized primers to prevent moisture and provide foundation.

Application

Multi-layer pigmented resins tailored to desired speed and cushion level.

Quality control

Final inspection for texture, color uniformity, and safety compliance.

11 Maintenance and low-term value

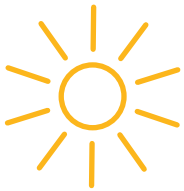

Low maintenance

Simple cleaning with water maintains vibrant looks and anti-slip properties.

Easy repairability

Localized repairs are fast and cost-effective without full surface replacement.

Color retention

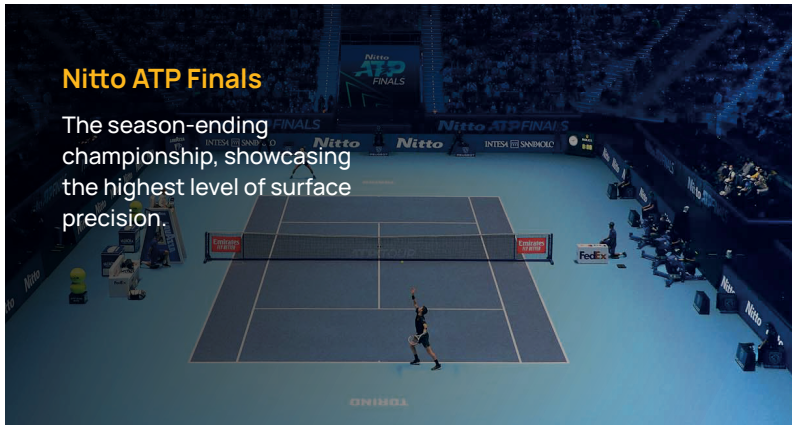

Advanced UV-resistant pigments ensure urban branding stays bright for years.

Smart investment

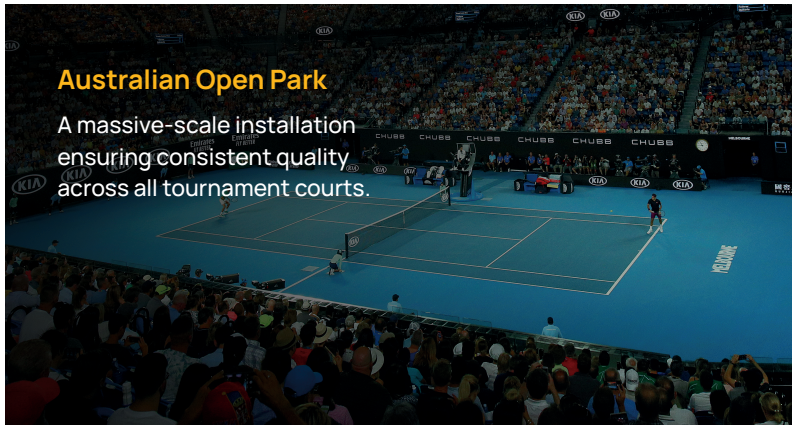

Lowest cost-per-year ratio due to extended life cycle and minimal upkeep.

12 Iconic Global projects

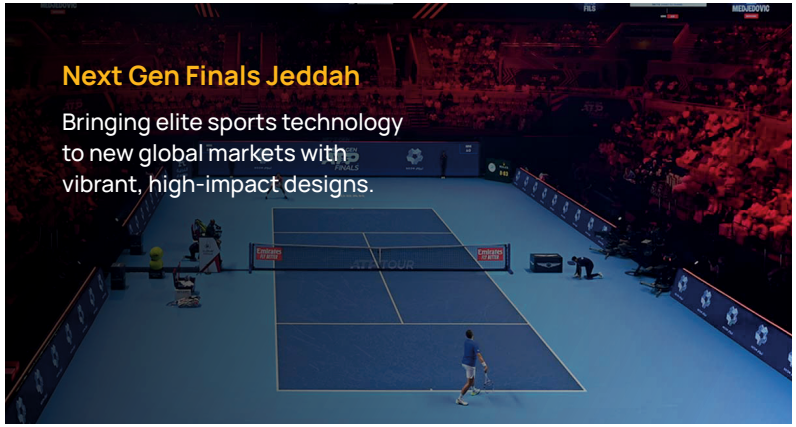

Nitto ATP Finals

The season-ending championship, showcasing the highest level of surface precision.

Australian Open Park

A massive-scale installation ensuring consistent quality across all tournament courts.

Next Gen Finals Jeddah

Bringing elite sports technology to new global markets with vibrant, high-impact designs.

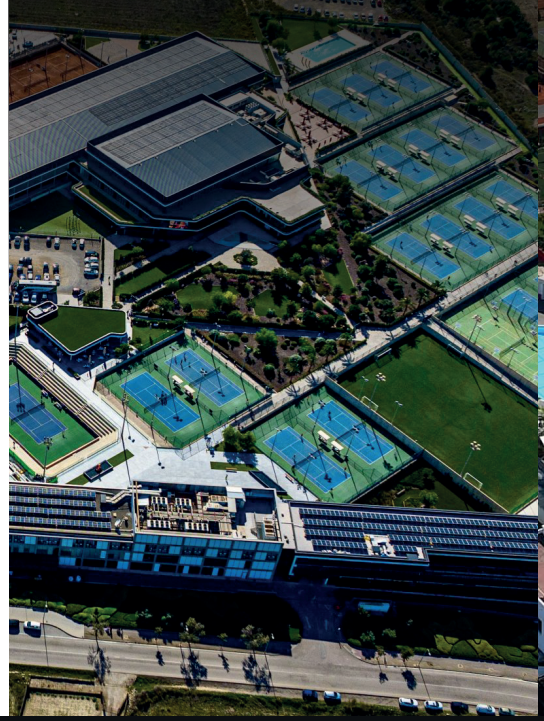

Rio 2016 Olympic Games

Proven performance on the world's biggest stage, meeting strict Olympic standards.

13 Elite Academies and Training Centers

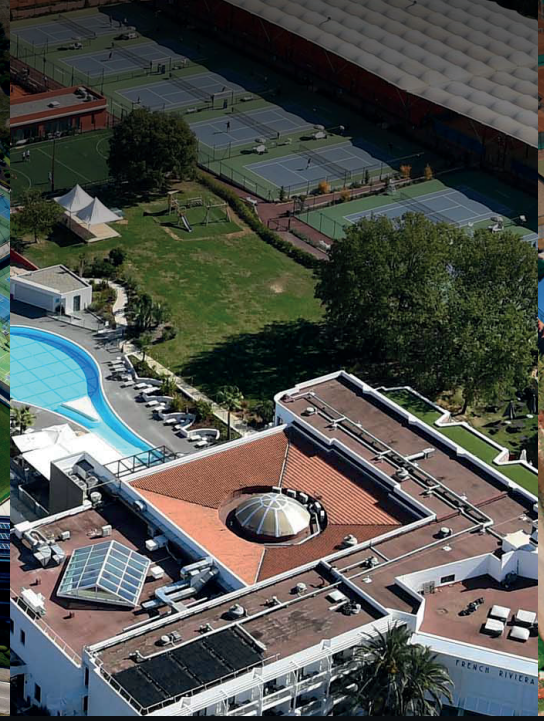

Rafa Nadal Academy

A global benchmark for excellence where high-performance surfaces meet the highest standards of training.

Mouratoglou Academy

Europe's leading tennis academy, relying on GreenSet for its extensive network of professional courts.

Sánchez-Casal Academy

Heritage and elite performance, providing champions with the ideal surface to hone their skills.

14 Global partnership and trust

Institutional Alliances

Preferred partner for major sports federations (ITF, ATP) and municipal governments worldwide.

The Champion's choice

Endorsed by elite athletes who rely on our surfaces for daily training and competition.

Expert Consultancy

Partnering with architects and planners to design the human-centric cities of tomorrow.

Onboarding Excellence

Dedicated support system to ensure clients maximize the value of GreenSet technology.

15 Why choose greenset urban?

Elite Prestige

Association with the world's most recognized brand in acrylic surfaces.

Technical Reliability

50 years of experience applied to urban safety and durability.

Custom Design

Infinite color possibilities to match any architectural vision.
