Our Tennis projects.

Our Tennis Courts.

01 » Grand Slam Eco Court

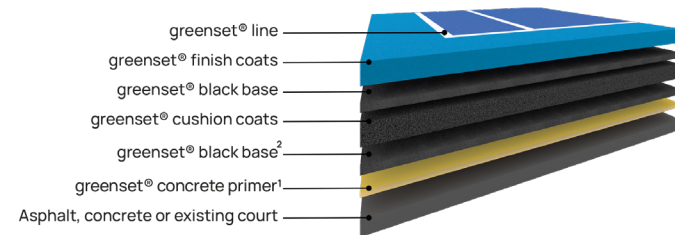

1 Needed for concrete surfaces: use concrete primer, bonding coat or Resurfacer
2 Only needed for new asphalt

The Grand Slam Eco Court mirrors the experience of professional players. Its innovative shock absorbency with sustainable cork offers a unique feel.

Our newest, most eco-friendly system.

02 » Grand Slam Court

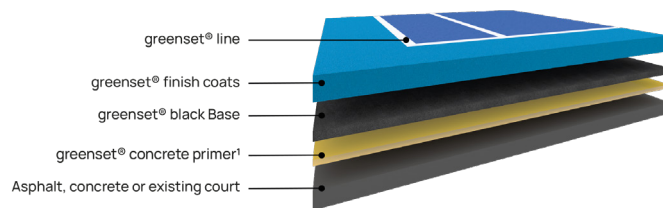

1 Needed for concrete surfaces: use concrete primer, bonding coat or Resurfacer
2 Only needed for new asphalt

The Grand Slam Court is the official surface of Australian Open. It is suitable for all kinds of players and game styles. Provides a high shock absorption and care for knee joints thanks to its layer of liquid rubber.

It is the most used surface in elite private clubs and facilities. Play like a pro!

03 » Tour Court

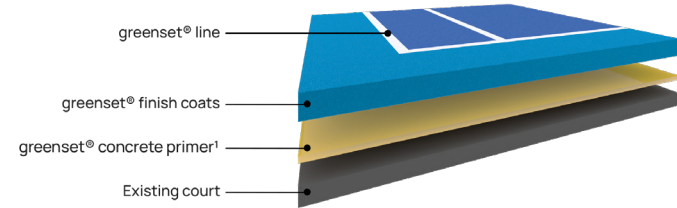

1 Needed for concrete surfaces: use concrete primer, bonding coat or Resurfacer

The Tour Court has helped young players worldwide to fulfill their dreams for over 50 years. Our best-selling surface is used in tennis academies, training centers and on the ATP and WTA tour. **The perfect court for all skill levels.**

04 » Club Court

1 Needed for concrete surfaces: use concrete primer, bonding coat or Resurfacer

The Club Court is our version of the Tour court for reduced budgets. Mainly used for resurfacing of existing courts, **this is our entry level court to experience greatness.**

Our Urban projects.

Our Urban Courts.

01 » Multisport Eco Cushion Court

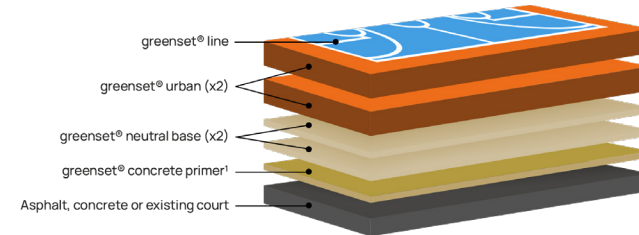

1 Needed for concrete surfaces: use Concrete Primer.
2 Only needed.

The Multisport Eco Cushion Court is a top quality, non-slip, wear-resistant surface for tennis and multisport floors, indoor and outdoor. Developed in 1970 for moderate shock absorption and joint care. ITF classified as Medium to Medium-Slow. **Most used in elite private clubs.**

02 » Multisport Urban Court

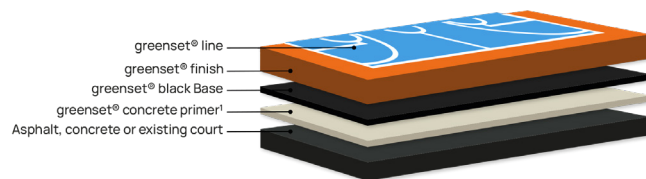

1 Only for Concrete.

The Multisport Urban Court is a high-quality, smooth acrylic coating specifically designed for continuous urban and sports pavements. Applied with roller, it provides a non-slip, wear-resistant surface **ideal for sustainable mobility infrastructures and recreational areas.**

03 » Multisport Tour Court

1 Needed for concrete surfaces: use Concrete Primer

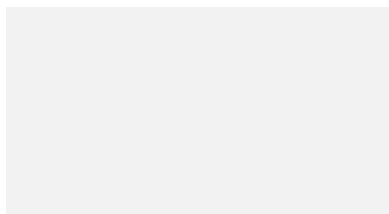

The Multisport Tour Court is a top-quality, non-slip, wear-resistant and highly durable surface engineered for intensive urban use and multisport facilities. Final coat applied with squeegee for maximum resistance and consistent playing experience, **indoors and outdoors.**
